# Highlights of 2Q FY2022 Results and FY2022 Forecast

### Highlights of 2Q FY2022 Results and FY2022 Forecast

#### < Highlights of 2Q FY2022 Results >

- ✓ Ordinary profit excluding the impact of inventory valuation rose ¥20.9 billion year on year to ¥82.0 billion, and due to an inventory impact of ¥91.8 billion, ordinary profit rose ¥78.8 billion year on year to ¥173.8 billion. Profit attributable to owners of parent increased ¥42.9 billion year on year, to ¥94.9 billion. Both ordinary profit and profit attributable to owners of parent reached a new record high for a second quarter.
- < Revision of FY2022 Forecast>
- ✓ Ordinary profit excluding the impact of inventory valuation is expected to reach ¥150.0 billion and profit attributable to owners of parent is expected to reach ¥115.0 billion.
- < Return to Shareholders>
- ✓ The Company plans to pay a dividend of ¥150 as announced previously in May (interim dividend of ¥75 and year-end dividend of ¥75), in anticipation of achieving the Medium-term Management Plan financial goals.
- ✓ Share buy backs up to a maximum acquisition cost of ¥20.0 billion have been carried out.

# Progress of the 6th Consolidated Medium-Term Management Plan

### Progress in Structural Reform in Medium-Term Management Plan

- ✓ In the Petroleum Business, a high operating ratio is maintained based on a short position strategy. This greatly contributed to Company-wide earnings.
- ✓ In the Renewable Energy Business, in the second half of FY2022, the Company expects to start operation at offshore wind power at Akita Port & Noshiro Port and both of onshore wind power at Kamiyuchi, and at Oita.

**Recent Major Topics** 

### Progress of the 6th Consolidated Medium-Term Management Plan

- ✓ Financial goals of the Medium-term Management Plan have been achieved one year ahead of schedule as of the end of FY2021.
- ✓ Financial position in FY2022 is expected to further improve.
- ✓ With the strengthening of profitability, the Company also earned an "A-" rating in external ratings. We will continue with efforts to improve its rating with the aim of achieving an "A" rating.

Management Goals		FY2022 Forecast	FY2021 Res	sults
Ordinary profit excluding the impact of inventory valuation	Over 120.0 billion yen	150.0 billion yen	160.8 billion yen	$\bigcirc$
Profit attributable to owners of parent	Over 50.0 billion yen	115.0 billion yen	138.9 billion yen

<sup>\*</sup> FY2018-FY2021 cumulative

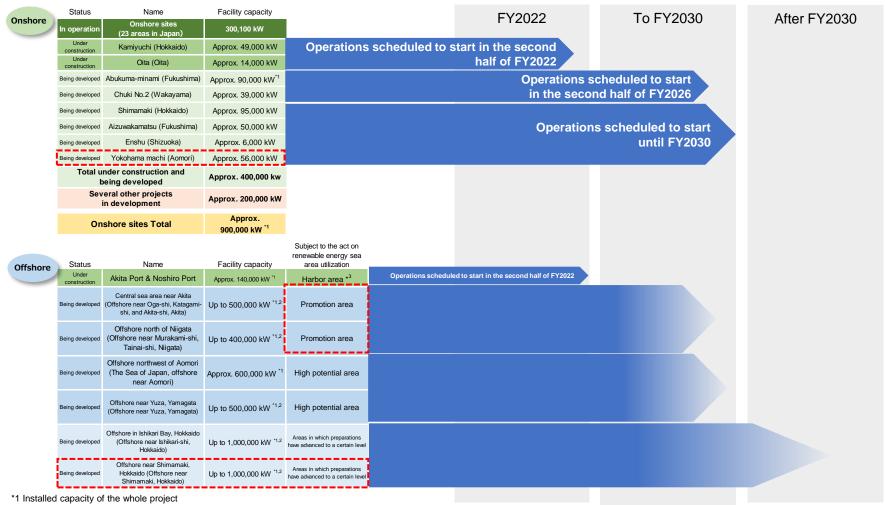

# Progress in Renewable Energy Business

### Progress in Wind power generation business

- ✓ FIT certification was obtained for onshore wind at Yokohama-machi, and an environmental impact statement was released for the Shimamaki offshore wind site in Hokkaido.
- Preparations are advanced for bidding on the central sea area near Akita and offshore north of Niigata, which were designated as promotional areas in September 2022.

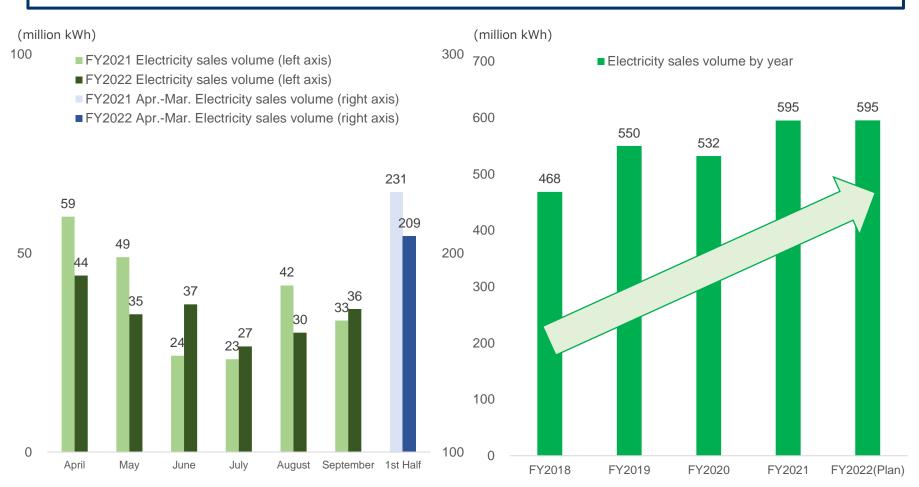

<sup>\*2</sup> Maximum capacity stated in the environmental impact assessment report

<sup>\*3</sup> Not subject to the Act on Promoting the Utilization of Sea Areas for the Development of Marine Renewable Energy Power Generation Facilities due to the port zone

## Trends in Cosmo Eco Power's electricity sales volume

- ✓ In the first half of FY2022, facility capacity did not change, but electricity sales volume decreased due to the deterioration of wind conditions.
- ✓ Electricity sales volume for the full year is expected to be the same level as the previous year, given the expected launch of offshore wind site at Akita Port and Noshiro Port, and onshore wind sites in Kamiyuchi and Oita.

#### **Development of next-generation energy**

We will accelerate efforts to achieve the 2030 SAF supply target of 300,000 KL per year

#### (1) SAF made from disposed cooking oil as a raw material

- ✓ The joint venture SAFFAIRE SKY ENERGY was established with JGC Holdings and REVO International to produce and supply 30,000 KL per year.
- ✓ SAF manufacturing facilities are expected to be constructed at Sakai refinery. From second half of FY2024 to early FY2025 is targeted for the start of operation.

#### (2)SAF made from ethanol

- ✓ Commenced a joint study with Mitsui & Co., Ltd. to produce and supply 220,000 KL per year. Aim to start production and supplying by FY2027.
  - \* LanzaJet, a US company in which Mitsui & Co., Ltd. has a stake, owns the Alcohol to Jet (ATJ) technology that provides an advantage to the large-scale production of SAF.

#### Offering of clean energy

- ✓ In October 2022, the Company began providing Cosmo Denki Business Green to public facilities in Yokosuka City and Zushi City in Kanagawa Prefecture.
- ✓ In addition to above local governments, cumulative supply to government agencies such as the Ministry of the Environment and Ministry of Defense as well as private sector companies has topped 1,000 facilities.

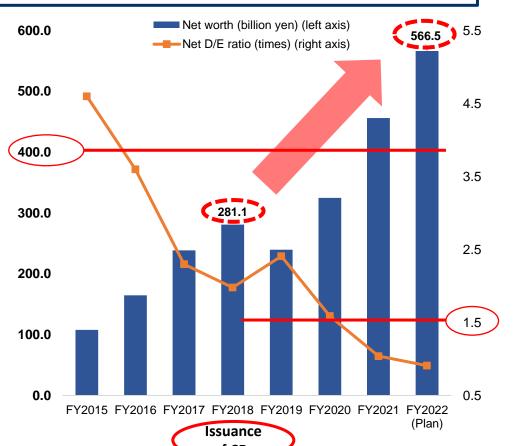

Repurchase of the Zero-Coupon Convertible Bonds due 2022 (being bonds with stock acquisition rights)

# Repurchase of the Zero-Coupon Convertible Bonds due 2022 (being bonds with stock acquisition rights)

- ✓ Financial position has improved significantly from the CBs were issued due to the strengthening of profitability in the current medium-term management plan.
- ✓ Further improvement in financial position is essential, but we decided to acquire CBs based on comprehensive consideration of the impact of recapitalization and stock dilution at the current point in time.
- ✓ Aim to increase enterprise value by improving EPS and ROE

ltem	Overview
Repurchase period	November 10, 2022 (Plan)
Subject of repurchase	Total face value ¥30.0 billion (maximum limit)
Total amount of Repurchased value	¥36.0 billion (maximum limit)

### COSMO

# 2Q FY2022 Results

✓ Consolidated ordinary profit excluding the impact of inventory valuation was ¥82.0 billion (up ¥20.9 billion year on year). Given the inventory impact of ¥91.8 billion, consolidated ordinary profit stood at ¥173.8 billion (up ¥78.8 billion year on year), with profit attributable to owners of parent of ¥94.9 billion (up ¥42.9 billion year on year). These are new record highs.

#### [Petroleum Business]

- ✓ Although margins on our four major products and overseas market conditions have improved, ordinary profit declined slightly due to refinery trouble, increasing in-house fuel costs, rising energy costs and other factors.
  - ⇒ Ordinary profit excluding the impact of inventory valuation was ¥30.8 billion (down ¥0.7 billion year on year).

#### [Petrochemical Business]

- ✓ MEK market conditions improved, but sales volume declined due to deteriorating olefin market prices, leading to a fall in ordinary profit.
  - ⇒ Ordinary profit was ¥7.8 billion yen (down ¥1.2 billion year on year).

#### [Oil Exploitation and Production Business]

- ✓ Ordinary profit rose due to rising crude oil prices.
  - ⇒ Ordinary profit was ¥41.1 billion yen (up ¥23.9 billion year on year).

#### [Renewable Energy Business]

- ✓ Ordinary profit fell due to the deterioration of wind conditions and the recognition of upfront costs related to the development of offshore wind power generation.
  - ⇒ Ordinary profit was -¥0.1 billion yen (down ¥0.6 billion year on year).

#### **Sustainability**

 Certified Yokkaichi Refinery as a certified business operator (super nintei jigyosha)

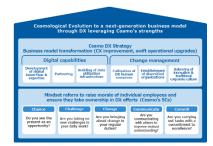

Yokkaichi Refinery (Certified August 2022)

- Successful demonstration of crude oil sludge volume reduction technology
- ✓ A behavioral change demonstration through the visualization of household electricity usage was conducted in Aizuwakamatsu.
- Selected as a constituent of the SOMPO
   Sustainability Indexes for the sixth consecutive year
- ✓ Began supply of electricity that is virtually all from renewable energy sources to 52 facilities including Chigasaki City Hall, elementary schools and junior high schools
- Completed switch to electricity that is virtually all from renewable energy sources at 603 directly operated service stations
- Commercialized Japan's first diesel oil with a biomass
- ✓ Earthquake BCP (business continuity planning) drills were conducted by Crisis response headquarters

#### DX

 Certificated as a DX-certified operator by Ministry of Economy, Trade and Industry

Cosmo's Vision House

- ✓ DX training for Cosmo Energy Group employees is under way (Approx. 5,200 employees from 22 Group
- ✓ DX questionnaire conducted (5,153 respondents from 22 Group companies)

companies have undergone in the training)

- $\rightarrow$  Confirm needs and provide an action program
- Aiming to quickly achieve the democratization of data, a tool that simplifies data utilization was introduced
- ✓ Full-scale start of a program to develop data science-oriented human resources
- Consideration of target values for DX-oriented human resources based on questionnaire results

#### COSMO

# Forecast for FY2022 Performance (Revision of Forecasts for FY2022)

#### Revision of FY2022 Forecast

- ✓ The Company has revised its full-year forecast, and consolidated ordinary profit will stand at ¥228.0 billion yen (up ¥38.0 billion from the previous forecast), consolidated ordinary profit excluding the impact of inventory valuation will come to ¥150.0 billion yen (down ¥5.0 billion from the previous forecast), and profit attributable to owners of parent will reach ¥115.0 billion (up ¥22.0 billion from the previous forecast).
- ✓ Consolidated ordinary profit excluding the impact of inventory valuation remained flat, but given improved inventory. impact due to the yen depreciation and other factors, both ordinary profit and profit attributable to owners of parent far exceeded previously announced figures.

# [2Q FY2022 Results] Crude Oil Production Volume, Crude Reserves Estimate (Proved and Probable)

[1] Crude oil production volume				
	2Q FY2022 Results	2Q FY2021 Results	Cha	nges
Cosmo Energy Exploration & Production Co., Ltd. (B/D)	45,426	45,951	-525	98.9%

- \* The production volume represents the total production volumes of the three major developers: Abu Dhabi Oil Co., Ltd., Qatar Petroleum Development Co., Ltd., and United Petroleum Development Co., Ltd.
- \* The production period has calculated in the January-June, because that the three major developers of the accounting period is December.
- \* The Cosmo Energy Group has a 51.5% stake in Abu Dhabi Oil Co., Ltd., a 75.0% stake in Qatar Petroleum Development Co., Ltd. and a 50.0% stake in United Petroleum Development Co., Ltd.

(As of Dec 31, 2021)

V 10 01	, ,	
[2] Crude Reserves Estimate (working interest base) *1		
	mmbls	
Total Proved *2 and Probable Reserves *3	143.1	
(Ref.: Reserves to Production Ratio of Total Proved and Probable Reserves)	about 17years	Note: The daily average crude production based on working interest reached 23 thousands bpd for FY2021 (Jan-Dec).

#### \*1 About results of reserves estimate

The assessment of ADOC reserves which deemed to have significant impact on Cosmo's future profitability was carried out in an independent assessment by Gaffney, Cline & Associate (hereinafter, "GCA"), a leading global independent reserve auditor. Their assessment confirmed Cosmo affiliates' internal assessment of remaining reserves. The assessment was carried out in accordance with the 2007 "Petroleum Resources Management System (PRMS)" prepared by the Oil and Gas Reserves Committee of the "Society of Petroleum Engineers" (SPE), and reviewed and jointly sponsored by the "World Petroleum Congress" (WPC), the "American Association of Petroleum Geologists" (AAPG) and the Society of Petroleum Evaluation Engineers (SPEE). The assessment of QPD and UPD reserves were carried out in these companies respectively. These assessments of the reserves do not guarantee the reserves and production from them.

#### \*2 Proved Reserves

Proved Reserves are those quantities of petroleum, which by analysis of geoscience and engineering data, can be estimated with reasonable certainty to be commercially recoverable, from a given date forward, from known reservoirs and under defined economic conditions, operating methods, and government regulations. When probabilistic methods are used, there should be at least a 90% probability that the actual quantities recovered will equal or exceed the 1P estimate. (Definition of SPE PRMS 2007 March)

#### \*3 Probable Reserves

Probable Reserves are those additional Reserves which analysis of geoscience and engineering data indicate are less likely to be recovered than Proved Reserves but more certain to be recovered than Possible Reserves. When probabilistic methods are used, there should be at least a 50% probability that the actual quantities recovered will equal or exceed the 2P estimate. (Definition of SPE PRMS 2007 March)

#### [Oil E&P Business]

#### COSMO

#### Overview: High Competitiveness due to Operatorship

- ✓ Based on a strong relationship of trust with Emirate of Abu Dhabi in the Middle East developed almost five decades, we have achieved low-risk, low-cost development.
- ✓ Abu Dhabi Oil Company extended concessions (30 years) in 2012 and obtained new concessions area, the Hail Oil Field is projected to the same production volume as its three existing oilfields.
- ✓ Started production from the Hail Oil Field in FY 2017 with production ramping up to full-scale in January 2018.

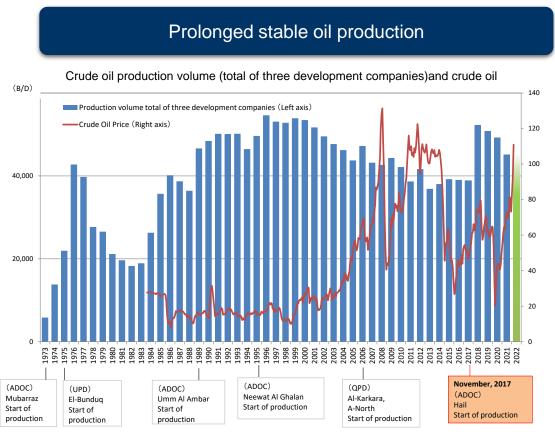

(\*) MIC (Mubadala Investment Company) in which The Emirate of Abu Dhabi has a 100% stake ,has been established as a holding company in association with the business combination of IPIC (International Petroleum Investment Company), and MDC (Mubadala Development Company).

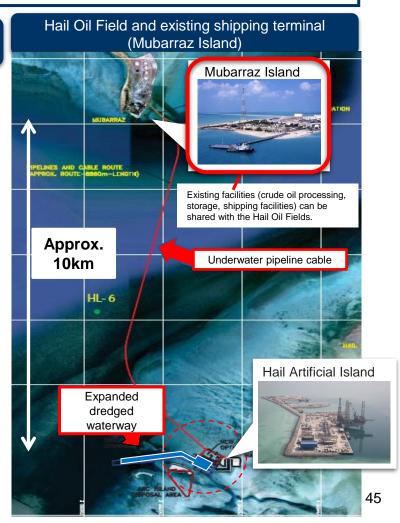

#### [Oil E&P Business] Growth Strategy

- ✓ The Hail Oil Field started production in November 2017. (interest period through year 2042)
- ✓ The Hail Oil Filed investment has been curbed with the shared use of existing oil processing, storage and shipping facilities (Estimated savings of 300-400 million dollars), and after the start of production, per unit operating costs are expected to decline for the increment of production volume.

- \*1) ADOC: Abu Dhabi Oil Company, UPD: United Petroleum Development, QPD: Qatar Petroleum Development
- \*2) Production volume of three development companies are per year (annual average of January to December each year)
- \*3) Crude oil prices (Platt's Dubai crude) are average monthly
- \*4) The production volume of three development companies after fiscal 2022 is prospective volume.

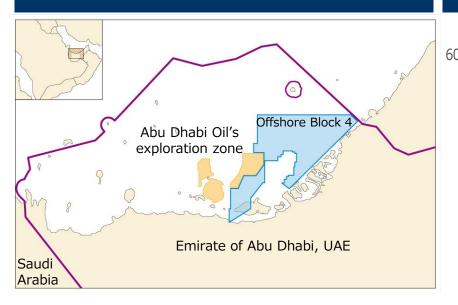

#### [Oil E&P Business] A Successful Bid for Offshore Exploration Block 4

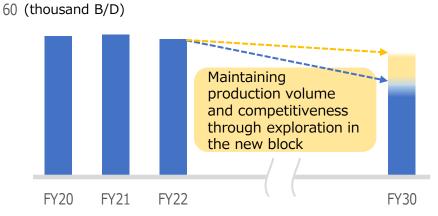

In the Abu Dhabi 2019 Block Bid Round in the United Arab Emirates, the Company won a bid for Offshore Exploration Block 4 (the "Block"). Recently established Cosmo E&P Albahriya Limited will engage in exploration with a view toward early exploitation and production. Main points are as follows.

- Oil indications have been confirmed in part of the Block.
- The Block is adjacent to the exploration zone of Abu Dhabi Oil Co., Ltd., a Cosmo Energy Group company. Integration with processing, storage and shipping facilities will reduce the two companies' capital investment and operating expenses and maximize synergy.
- With production in this Block, the Company will build a robust busines portfolio that makes a profit even in a low oil price environment while maintaining the Group's crude oil production level.
- With a view toward the creation of a sustainable society, the Group will positively study the development and application of CCS, CCUS and other technologies required for a decarbonized society.

#### Location of Offshore Block 4

## Schematic of trend in the Group's crude oil production

#### [Petroleum Business]

- Strengthening competitiveness through an alliance with Kygnus Sekiyu K.K.
- Conclude a capital and business alliance with Kygnus Sekiyu K.K. and acquired 20% of common shares.
- Begin supplying petroleum products to Kygnus Sekiyu K.K. around FY2019.
- Advance discussion and consideration with a view to a business alliance, in addition to the supply of petroleum products.

Kygnus Sekiyu K.K.

2.695

(As of Mar.31,2022)

## **Cosmo Oil Refineries KYGNUS** (Chiba, Yokkaichi, Sakai) Capital and Business Alliance **Cosmo Energy Group** Domestic Sales Volume 23.210 thousand KL Number of Service stations

Service station operators

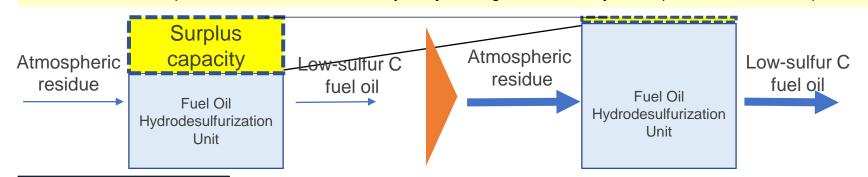

Factory etc.

#### [Petroleum Business] IMO (International Maritime Organization) Regulations

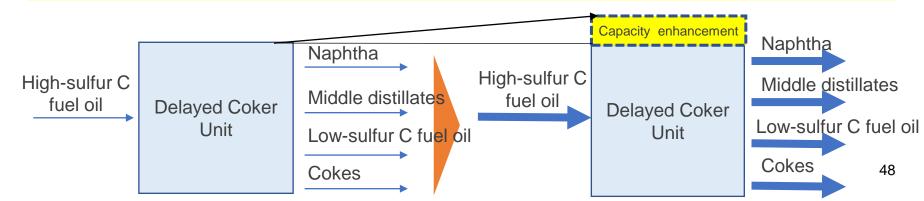

✓ International Maritime Organization (IMO) is to strengthen its regulation in 2020 by setting the upper limit of sulfur content from 3.5% down to 0.5% and the shipping fuel will be switched from high sulfur C heavy fuel to conforming low sulfur C heavy fuel.

#### Sakai Refinery

Enhance Sakai Refinery's Delayed coker capacity and turn high sulfur C heavy oil into high value added products

- ✓ Market : Enter the niche market of auto-leases for individuals that leasing companies could not serve
- ✓ Strategy: Acquire customers using the strengths of SS (frequent contacts of individual customers, etc.)
- ✓ Risk : Low risk due to the absence of car inventory and credit risk
- ✓ Business model: All parties, including customers, leasing companies, Cosmo, and dealerships, win.

#### Characteristics

Entry to the market with high potential demand

Extremely small ratio of ownership of private vehicles by lease

 $\Rightarrow$  High potential demand

#### Using the strengths of SS

- Frequent contact with individual Customers (500,000 units/day) (\*1)

  (\*1) The number of cars of customers visiting Cosmo SS (estimated by Cosmo)
- Fuel oil discount system (patented business model)

#### Low risk

 Because the SS play the role of dealerships, there is no credit risk or risk of keeping vehicle inventory.

#### Win-win business model

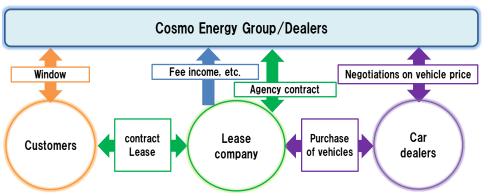

Customers

- : Being able to drive new cars of any maker and model for a price lower than purchasing
- No complicated procedures
  - e.g. Simplified expenses for using a car (monthly flat rate that includes safety inspections, taxes, insurance, etc.)

Lease companies : Capture new customers

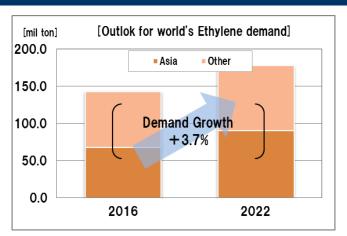

Cosmo, dealerships: Secure revenue sources that are not

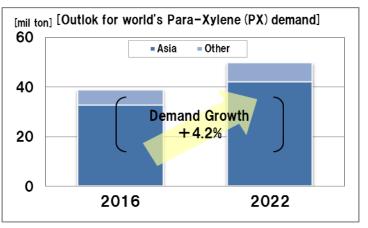

solely dependent on fuel oil

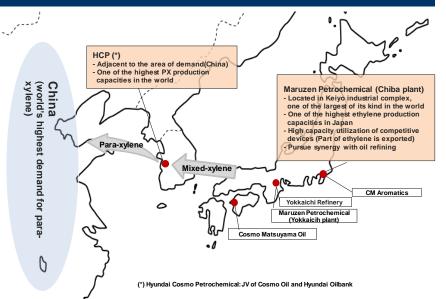

#### Expected global demand for petrochemical products

Source: Global Demand Trends for Petrochemical Products of the Ministry of Economy, Trade and Industry (2016-2022)

#### Strengths of Cosmo Energy Group

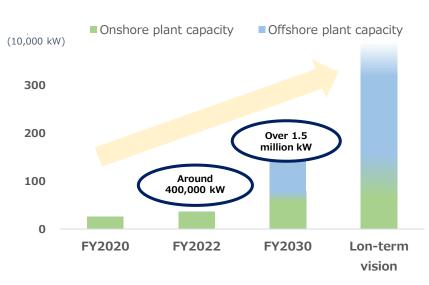

#### Production capacity

Pro	duct	Manufacture	Production capacity
Olefin-based	Ethylene	Maruzen Petrochemical	*1.290 mil t/year
Aroma-based	Para-xylene	Hyundai Cosmo PetroChemical	1.360 mil t/year
	Benzene	Maruzen Petrochemical	0.395 mil t/year
		Hyundai Cosmo PetroChemical	0.250 mil t/year
		Cosmo Matsuyama Oil	0.090 mil t/year
		Total	0.735 mil t/year
	Mixed-xylene	Cosmo Oil (Yokkaichi Refinery)	0.300 mil t/year
		CM Aromatics	0.270 mil t/year
		Cosmo Matsuyama Oil	0.048 mil t/year
		Total	0.618 mil t/year
	-	Aroma-based, total	2.713 mil t/year

 <sup>\*</sup> Includes production capacity of Keiyo Ethylene
 (55% owned, consolidated subsidiary of Maruzen Petrochemical)

#### Changes in wind power generation capacity

<sup>\*</sup> Installed capacity is capacity commensurate with the Company's investment.

#### Overview of Cosmo Eco Power Capital: 7.1 billion ven Number of power generators: 175 (23 areas) Construction started (onshore) Power generation capacity: 300,100 kW Kamiyuchi (FY2022 2H) Industry share: Around 7% (approx. 49,000 kW) \*As of September 31, 2022 Under development (onshore) Construction started (offshore) Shimamaki (Until FY2030) (approx. 94,000 kW) Akita port & Noshiro Port (FY2022 2H)(approx. 140,000 kW) Under development (onshore) Construction started (onshore) Yokohama-machi (Until FY2030) (approx. 56,000 kW) Oita (FY2022 2H) (approx. 14,000 kW) Under development (onshore) Aizuwakamatsu (Until FY2030) (approx. 50,000 kW) Under development (onshore) Under development (onshore) Abukuma Minami (FY2026 2H) Enshu (Until FY2030) Under development (onshore) (approx. 90,000 kW) (approx. 6,000 kW) Chuki No.2 (FY2026 2H) (approx. 50,000 kW)

#### Characteristics (strengths) of the Group

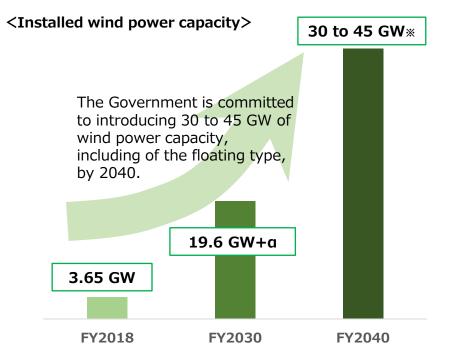

- ✓ Making Eco Power Co., Ltd., a pioneer in the wind power generation business (founded in 1997), a Group company in 2010.
- Achieving high on-wind availability (90% or more) through development, construction, operation, and maintenance within the Group.
- Reducing risks of changes in wind conditions in each region and securing stable profit by placing wind power plants across the nation.
- ✓ Aiming to expand the business in the long term by expanding sites on land and participating in an offshore wind farm project.

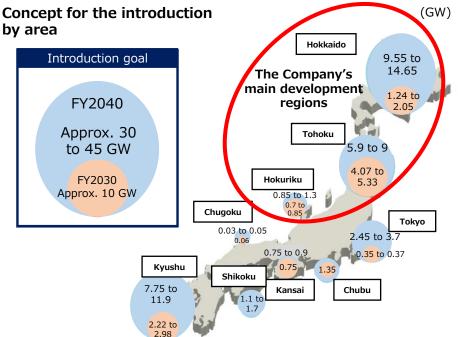

## [Renewable energy business] Circumstances Surrounding the Wind Power Generation Business

- ✓ The Japanese government formulated a Green Growth Strategy towards Carbon Neutrality in 2050.Offshore wind power generation is defined as a main power source from renewable energy.
- ✓ The Green Growth Strategy is outlined as follows.
- The government sets introduction targets of 30 to 45 gigawatts (GW) by 2040.
- · A government-led proactive project formation scheme (a Japanese version of the central method) is under consideration
- Infrastructure development: Grid operation rules prioritizing renewable energy, grid construction linking locations suited to wind power generation and power demand locations and the construction of base ports
- ✓ Under the Sixth Strategic Energy Plan (draft) announced in July 2021, the target for the capacity of wind power generation facilities by 2030 increased substantially from 10 million kW to 19.6 million kW or more due to the additional introduction of renewable energy.

#### **Concept for the Introduction of Offshore Wind Power Generation**

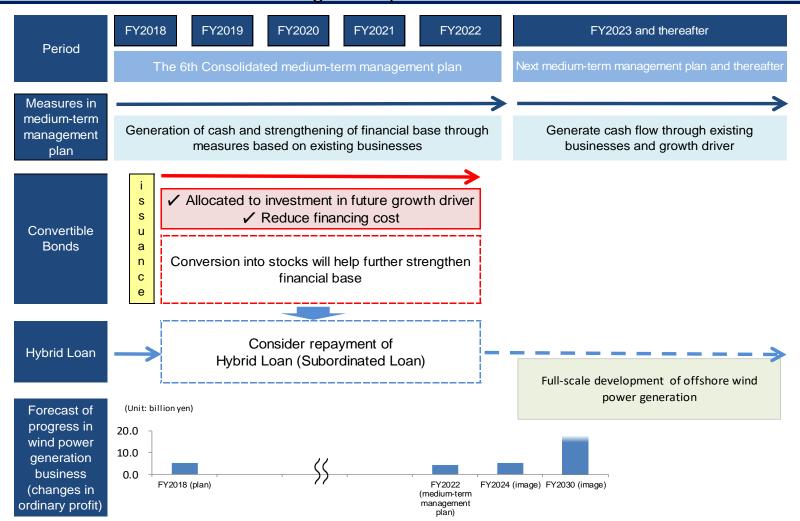

Item	Overview
Financing amount	¥30.0 billion
Loan agreement date	March 26, 2020
Drawdown date	March 31, 2020
Use of loan proceeds	Early repayment of an existing subordinated loan
Maturity date	March 31, 2053
Dates early repayment can be made	Any interest payment date on or after March 31, 2023
Replacement provisions	<ul> <li>In the event of early repayment, refinancing will be performed with a product with equity credit equivalent to or higher than the Subordinated Loan.</li> <li>Provided, however, that the above refinancing may be postponed is the following conditions are satisfied. <ul> <li>(i) If consolidated net worth increases by ¥30 billion or more from September 30, 2019</li> <li>(ii) If the consolidated debt/equity ratio does not worsen from September 30, 2019</li> </ul> </li> </ul>
Interest rate	Variable interest rate based on 3-month Yen TIBOR + Spread
Interest rate step-up	-
Equity credit rating assigned by rating agency	Japan Credit Rating Agency, Limited: Medium / 50%.

Date of payment and issuance	December 5, 2018
Maturity date	December 5, 2022
Benefits	<ol> <li>Financing cost can be reduced by issuring bonds without attaching interest (zero coupon).</li> <li>The bonds will be offered primarily to investors in overseas markets, which, therefore, will contribute to the diversification of financing methods and can be expected to increase the flexibility of the company's future financing strategies.</li> <li>A rider will be attached to promote the conversion into stocks, and converted stocks will contribute to further strengthening and improvement of the company's financial base in the future.</li> <li>Since the conversion price will be set to exceed the bonds' market value, the bonds are expected to be coverted into stocks mainly when shareholder value grows, such as a future increase in stock price, which will help control the dilution of per-share value resulting from the conversion.</li> </ol>
Uses of funds	<ol> <li>Allocate approx. 11.0 billion yen by March 2021 as funds for investment and loans for a subsidiary in petrochemical business in order to increase competitiveness through means such as reduction of maintenance costs, and expansion of high-value-added products.</li> <li>Allocate approx. 49.0 billion yen by March 2021 as funds for investment and loans for a subsidiary in the wind power generation business in order to construct onshore and offshore wind power sites.</li> </ol>

- ✓ Secure funds for investment and loans to strengthen the "New" part of the growth driver, "Oil & New," for the future.
- ✓ For the time being, increase capital by accumulating profit through the execution of the current medium-term management plan.

#### **Cash Flow Management**

Dividends

- 1. The conventional policy will not change for the cash balance for the entire period of medium- term management plan.
- Therefore, the issuing of convertible bonds this time means a change in financing method within cash flow from financing activities.
- The company does not intend to increase interest-bearing debt from the conventional plan.

#### Cash balance and use of funds (FY2018 - FY2022)

(Unit: billion yen) (1) Cash flow from operating activities 535.0 ✓ No change from medium-term (2) Cash flow from investing activities -360.0management plan (3) Free cash flow (1) + (2)175.0 ✓ Of the investment made in FY2019 and FY2020, 60 billion yen financed (4) Cash flow from financing activities -175.0through CB is allocated to petrochemicals and wind power (Breakdown of cash flow from financing activities) generation businesses as a major -XXX.X Repayment of debts change in the business portfolio. +XXX.X **Borrowing** Partial change Convertible bonds +60.0

#### Disclaimer FORWARD-LOOKING STATEMENTS

Certain statements made and information contained herein constitute "forward-looking information" (within the meaning of applicable Japanese securities legislation). Such statements and information (together, "forward looking statements") relate to future events or the Company's future performance, business prospects or opportunities. Forward-looking statements include, but are not limited to, statements with respect to estimates of reserves and or resources, future production levels, future capital expenditures and their allocation to exploration and development activities, future drilling and other exploration and development activities, ultimate recovery of reserves or resources and dates by which certain areas will be explored, developed or reach expected operating capacity, that are based on forecasts of future results, estimates of amounts not yet determinable and assumptions of management.

All statements other than statements of historical fact may be forward-looking statements. Statements concerning proven and probable reserves and resource estimates may also be deemed to constitute forward-looking statements and reflect conclusions that are based on certain assumptions that the reserves and resources can be economically exploited. Any statements that express or involve discussions with respect to predictions, expectations, beliefs, plans, projections, objectives, assumptions or future events or performance (often, but not always, using words or phrases such as "seek", "anticipate", "plan", "continue", "estimate", "expect, "may", "will", "project", "predict", "potential", "targeting", "intend", "could", "might", "should", "believe" and similar expressions) are not statements of historical fact and may be "forward-looking statements". Forward-looking statements involve known and unknown risks, uncertainties and other factors that may cause actual results or events to differ materially from those anticipated in such forward-looking statements.

The Company believes that the expectations reflected in those forward-looking statements are reasonable, but no assurance can be given that these expectations will prove to be correct and such forward-looking statements should not be unduly relied upon. The Company does not intend, and does not assume any obligation, to update these forward looking statements, except as required by applicable laws.

These forward-looking statements involve risks and uncertainties relating to, among other things, changes in oil prices, results of exploration and development activities, uninsured risks, regulatory changes, defects in title, availability of materials and equipment, timeliness of government or other regulatory approvals, actual performance of facilities, availability of financing on reasonable terms, availability of third party service providers, equipment and processes relative to specifications and expectations and unanticipated environmental impacts on operations. Actual results may differ materially from those expressed or implied by such forward-looking statements.
