President

(Company Code: 5007,

Shares traded: TSE, OSE, and NSE first
sections)

Name of Contact Person: Atsuto Tamura,
Executive Officer & General Manager,
Corporate Communication Dept.

Phone: 03-3798-3101

Notice Concerning the Amendment to the Forecast for Full-Year Business Performance

Based on the recent business climate and other factors, amendments have been made as follows to the Consolidated Full-Year Business Outlook and Non-Consolidated Full-Year Business Outlook for the FY2006 (ended March 31, 2007), which were released during the announcement of the third quarter results of FY2006 on February 6, 2007.

1. Amendments to the Consolidated Full-Year Business Outlook for FY2006 (from April 1, 2006 –March 31, 2007):

(Units: million yen, %)

	Net sales	Ordinary income	Net income
Previously announced forecast (A) (announced on February 6, 2007)	3,040,000	61,000	17,000
Currently amended forecast (B)	3,030,000	73,000	25,000
Variance (B-A)	△10,000	12,000	8,000
Rate of variance	△0.3%	19.7%	47.1%
Actual results of the previous year (ended March 31, 2006)	2,670,628	119,557	61,795

2. Amendments to the Non-Consolidated Full-Year Business Outlook for FY2006 (from April 1, 2006 – March 31, 2007):

(Units: million yen, %)

	Net sales	Ordinary income	Net income
Previously announced forecast (A) (announced on February 6, 2007)	2,840,000	△3,000	△7,000
Currently amended forecast (B)	2,830,000	7,500	1,500
Variance (B-A)	△10,000	10,500	8,500
Rate of variance	△0.4%	—	—
Actual results of the previous year (ended March 31, 2006)	2,495,351	75,558	46,497

3. Reasons for the amendments:

The above amendments to the business outlook for the full year of FY2006 mainly reflect expected positive factors including a decrease in cost of sales due to the effect from inventory valuation under the weighted average method, as affected by a rise in crude oil prices in comparison with the previous assumptions (announced on February 6, 2007).

Note: The above outlook is based on data and information available as of the date of publication. However, actual results may differ materially from the forecasts due to effects from various factors.
