

An energy company building a sustainable, prosperous society

The Cosmo Energy Group will strengthen its financial condition by increasing profitability of the Oil Exploration and Production Business and the Petroleum Business. From the perspective of long-term changes in the business environment, the Group will also expand its business portfolio by actively investing in the Renewable Energy Business and increasing the competitiveness of the Petrochemical Business.

Cosmo Energy Group Management Vision

In striving for harmony and symbiosis between our planet, man and society, we aim for sustainable growth towards a future of limitless possibilities.

Our Basic Approach to Sustainability

Harmony and Symbiosis

Harmony and Symbiosis with the Global Environment
Harmony and Symbiosis between Energy and Society
Harmony and Symbiosis between Companies and Society

Creating Future Values

Creating the Value of "Customer First"
Creating Value from Diverse Ideas of the Individual
Creating Value by Expressing Collective Wisdom

Brand statement

Filling up your hearts, too.

Oil & New

Everything About Oil – And Beyond

The Sixth Consolidated Medium-Term Management Plan is based on the profit foundation established in the previous consolidated medium-term management plan. We are continuing the previous consolidated medium-term management plan's main initiative of improving the profitability of the oil refining and sales business (Oil) as well as advancing growth investment in the petrochemical business and the wind power generation business (New) with the aim of expanding the business portfolio, which anticipates no use of fossil fuel.
