Project for Biofuel Bunkering in the Port of Tokyo Selected for Subsidy
under the Tokyo Metropolitan Government's Commercialization Promotion Support
Project for the Utilization of Decarbonized Fuels
~Supporting the Realization of “Zero Emission Tokyo” by Participating
in NX Shoji-Led Initiative~

Cosmo Oil Marketing Co., Ltd. (hereafter “the Company”), a subsidiary of Cosmo Energy Holdings Co., Ltd., is pleased to announce its participation in the *Project for Ship-to-Ship Biofuel Bunkering in the Port of Tokyo* (hereafter “the Project”), with NX SHOJI CO., LTD. (hereafter “NX Shoji”) serving as the representative constituent. The Project was selected to receive a subsidy under the *Commercialization Promotion Support Project for the Utilization of Decarbonized Fuels*, a collaborative effort organized by the Tokyo Metropolitan Government and Tokyo Environmental Public Service Corporation to support biofuel initiatives¹.

Scheduled to start this fall, the Project will leverage NX Shoji's biofuel bunkering scheme to supply B24 fuel, a blend of heavy fuel oil A and biofuel (FAME²), to ships used by the Company and vessels of other participating companies that call at the Port of Tokyo. As part of this effort, the Company will supply heavy fuel oil A as feedstock, while NX Shoji handles the blending. The resulting biofuel will then be delivered to the Company's ships.

The Project is being implemented with the support of the Tokyo Metropolitan Government. The Company will utilize environmentally friendly biofuel and promote its commercialization and use in vehicles, ships, and other transportation modes, while also working to stimulate related industries.

In addition, through the introduction of biofuels, the Company will contribute to achieving the Tokyo Metropolitan Government's *Zero Emission Tokyo Strategy* and to a sustainable society.
