Cosmo Energy Holdings Co., Ltd.  
Cosmo Oil Marketing Co., Ltd.

**Cosmo Oil Marketing Deploys Official EV and Standard Charging Stations  
at Kamagaya City Hall, Chiba Prefecture**  
~Realizing Emission-Free Driving with Renewable Energy-Derived Electricity  
and Promoting Local Decarbonization~

Cosmo Oil Marketing Co., Ltd. (hereafter, "the Company"), a subsidiary of Cosmo Energy Holdings Co., Ltd., has introduced one electric vehicle (EV) for use as an official vehicle and installed two standard charging stations at Kamagaya City Hall, Chiba Prefecture. By utilizing 100% renewable energy-derived electricity that is already supplied to the building, the official EV will meet the "Zero Carbon Drive"<sup>1</sup> initiative's goal of achieving carbon dioxide (CO<sub>2</sub>) emission-free driving. In addition, Kamagaya City will make the newly installed EV charging stations available for public use, thereby promoting decarbonization in the local community.

Official EV

Standard charging station

Since December 2023, Kamagaya City has adopted the Company's renewable energy-derived electricity plan, "Cosmo Denki (Electricity) Business Green,"<sup>2</sup> at 30 facilities, including City Hall as well as elementary and junior high schools, with total annual electricity consumption of approximately six million kilowatt-hours (kWh). In this most recent move, the Company made EV charging via City Hall's renewable electricity possible by performing electrical installation work to connect standard charging stations to onsite cubicle-type high-voltage power receiving equipment. As a result, the City's official EV can be charged using electricity derived from wind power generated by Cosmo Eco Power Co., Ltd., a Cosmo Energy Group company, thereby achieving emission-free driving. This initiative was implemented as part of the Company's "Cosmo Zero Carbon Solution"<sup>3</sup> service.

With the introduction of Cosmo Denki (Electricity) Business Green, Kamagaya City achieved an approximately 46% reduction in greenhouse gas emissions from its administrative operations in FY2024 compared with the base year (FY2016). By making the newly installed EV charging stations available to the public for a fee, the City aims to further accelerate decarbonization efforts across the local community.

Going forward, the Company remains committed to supporting local governments and companies in reducing their environmental impact and will continue to undertake various initiatives toward the realization of a decarbonized society.

Kamagaya City Hall

1. About the Zero Carbon Drive Initiative (abbreviated as “Zero Drive”)

Zero Carbon Drive refers to CO<sub>2</sub> emission-free driving through the use of electricity derived from solar, wind, and other renewable energy sources together with EVs, plug-in hybrid electric vehicles (PHEVs), and fuel cell vehicles (FCVs).

2. About Cosmo Denki (Electricity) Business Green

Cosmo Denki (Electricity) Business Green is a service that helps businesses achieve net zero CO<sub>2</sub> emissions by providing them with added environmental value in the form of non-fossil certificates and other designated renewable energy certificates. Customers purchase such certificates with a value equivalent to or greater than their total annual sales volume as part of the electricity sales process, thereby receiving proof that all the electricity they use is effectively derived from a renewable energy source in terms of its environmental value.

3. About Cosmo Zero Carbon Solution

Cosmo Zero Carbon Solution offers corporations and local governments a one-stop solution encompassing renewable energy and complementary products, such as EVs, in close collaboration with local service station operators. It provides comprehensive support for their decarbonization efforts and helps reduce their electricity bills.
