## Kyocera and Cosmo Energy Group to Begin Reciprocal Renewable Energy Supply from Wind and Solar Power from April 2026

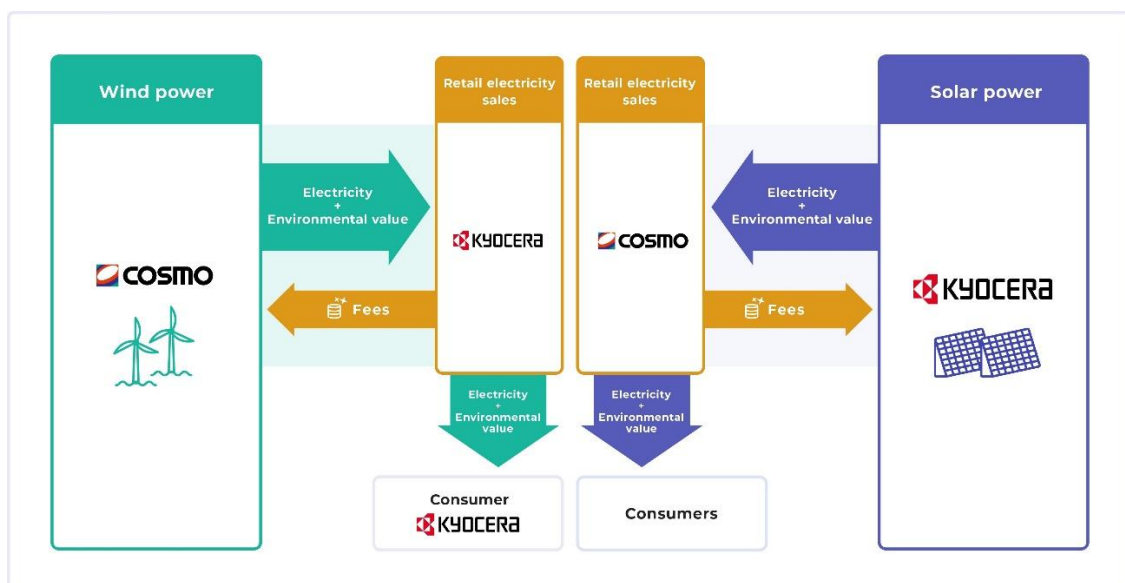

~Marking Kyocera's First Wind Power-Based Physical PPA~

Cosmo Eco Power Co., Ltd. (hereafter, "Cosmo Eco Power"), a subsidiary of Cosmo Energy Holdings Co., Ltd., and Kyocera Corporation (hereafter, "Kyocera") are pleased to announce that, effective March 3, 2026, they have signed a physical Power Purchase Agreement<sup>1</sup> (PPA; hereafter, "the PPA") for electricity generated from wind power. This marks Kyocera's first wind power-based physical PPA.

Under the PPA, Kyocera will receive electricity generated at Cosmo Eco Power's Chuki Wind Farm, which commenced commercial operations in April 2021, along with the associated environmental value, for use at its various facilities. As a result, Kyocera is expected to achieve an annual CO<sub>2</sub> emissions reduction of approximately 6,300 tons.

In conjunction with the PPA, the parties have also agreed that, starting in April 2026, Cosmo Energy Solutions Co., Ltd. (hereafter, "Cosmo Energy Solutions"), a Cosmo Energy Group company, will procure electricity generated by solar power assets owned and operated by Kyocera, as well as the associated environmental value.

### •Structure of the PPA

Through this initiative, Kyocera, Cosmo Eco Power, and Cosmo Energy Solutions will strengthen the mutual utilization of wind- and solar-generated renewable energy. Looking ahead, the three companies will further deepen their collaboration toward realizing a decarbonized society by exploring new possibilities for energy use that leverage their respective strengths, including battery storage systems.
