

The Eco Card Fund Promise

While the Cosmo Energy Group's oil helps create comfortable lifestyles, it's also a fact that it impacts the environment. Accordingly, we have been addressing environmental concerns as early as the 1990's. We have never turned away from these problems but have addressed them fully because we recognize that we have a responsibility to make every effort to protect the environment.

Part of this commitment is our Eco Card Fund, which we are operating with your help as part of our "Living on the earth forever" project. While implementing measures to slow climate change and protect ecosystems, we are supporting organizations that are working steadily to solve fundamental problems such as poverty.

We have received far more support than predicted prior to launching the Fund and thanks to that support, have been able to achieve a range of results both in Japan and abroad. We will continue to work single-mindedly toward our goals while listening to the voices of all stakeholders.

How the Eco Card Fund Works

But what does this mean?

- I want a convenient and comfortable life. **But** my use of oil products increases CO₂.
- For this reason, I want to support environmental conservation activities through the Eco Card Fund.
- This helps protect and nurture healthy forests and so reduces CO₂.
- "Living on the earth forever" with an Eco Card.
