

The Eco Card Fund Promise

While the oil handled by the Cosmo Energy Group has created comfortable lifestyles, it's also a fact that it impacts the environment. Accordingly, we have been addressing environmental concerns as early as the 1990's. We have never turned away from these problems but have addressed them fully because we recognize that we have a responsibility to make every effort to protect the environment.

Part of this commitment is our Eco Card Fund, which we are operating with your help as part of our "Living on the Earth Forever" project. While implementing measures to slow climate change and protect ecosystems, we are supporting organizations that are working steadily to solve fundamental problems such as poverty.

We have received far more support than predicted prior to launching the Fund and, thanks to that support, have been able to achieve a range of results both in Japan and abroad. We will continue to work single-mindedly toward our goals while listening to the voices of all stakeholders.

How the Eco Card Fund Works

What does it mean?

- I want a convenient and comfortable life. But my use of oil increases CO₂.
- For that reason, I want to support environmental conservation activities through the Eco Card Fund.
- This helps protect the forest to grow well and reduce CO₂.
- "Living on the Earth Forever" That's why we have an Eco Card.

Let's look at details.

How the Eco Card works

- If you have an Eco Card → ¥500 is automatically donated to the Eco Card Fund annually
- Every time you gas up, or wash your car with Eco Card → Cosmo donates 0.1% of your payment to the fund
- If your annual payment via Eco Card exceeds ¥200,000, and if you have been an Eco Card holder for more than 10 years → Cosmo will automatically donate ¥1,500 to the Eco Card Fund every year
- For every Eco battery you purchase → Cosmo makes a donation of ¥10 to the Eco Card Fund

NEWS

Awarded the Medal with Dark Blue Ribbon for Philanthropy!

The Cosmo Oil Eco Card Fund has engaged in environmental activities in Japan and abroad in partnership with the NPO OISCA. We have supported a variety of activities including Tropical Rainforest Conservation (see page 3) in Papua New Guinea, which started in 2002. We have been awarded the Medal with Dark Blue Ribbon in recognition of the public service provided by these support activities over many years.

Award accepted by: Ms. Etsuko Nakano, Chairperson, OISCA
Awardee: Hiroshi Kiriya, Cosmo Energy Holdings Co., Ltd. President/Group CEO

Honorable Prize received at the 28th Global Environment Awards!

Cosmo Energy Holdings Co., Ltd. has received an award for its corporate contribution to the prevention of global warming. In addition to development of new environmental technology for oil development projects, the company is highly regarded for its Eco Card Fund activities which it has pursued in tandem with you the members. We look forward to your continuing support for our activities targeting fundamental solutions to environmental problems.
